Suppliers

Ethical Purchasing;

- We purchase a wide range of goods and services required in the operation of our business and we also rely heavily on a large number of critical suppliers for the delivery of our core services. Good working relationships with our suppliers are, therefore, central to the success of our business. For this reason, we clearly state our purchasing policy as part of ensuring that our business standards and Policies are integrated throughout the supply chain.
- We are committed to obtaining and retaining competitive goods and services while at the same time ensuring they are from sources which have not jeopardised human rights, safety or the environment.
- We endeavour to use locally based companies where possible, ensuring that items purchased are Fair Trade when relevant and available.
- We aim to develop strong relationships with our suppliers, based on mutual trust, understanding and respect.
- More specifically we expect our suppliers to:
 - Adhere to business principles consistent with our own.
 - Ensure that their products and services are produced and delivered to comply with all legislation relevant to their business.
 - Seek to maintain continuous improvement in their supply chain relationship with us.
 - Ensure they adopt and implement acceptable safety, environmental, product quality, product stewardship, labour, human rights, social and legal standards and in line with our own code and to ensure these issues are acceptably managed within the supply chain for any products supplied to us.
